Space Administration

## NOT YET IMAGINED

A STUDY OF HUBBLE SPACE  
TELESCOPE OPERATIONS

NASA's History Division is pleased to present **Christopher Gainor's** new, richly illustrated book documenting the Hubble Space Telescope's spellbinding 30-year history of operations in space. Gainor details Hubble's development and launch; its repair and upgrading through several servicing missions; and the effects of its continuing contributions to our knowledge of our solar system, galaxy, and universe. Discover how Hubble's mission has become a model of supranational cooperation among scientists and how the images it produces have expanded our appreciation for the universe.
